

Material: 0.030 HP92
 Tolerance: +- 0.015
 Adhesive: 3M 468MP

- (1) The background must be opaque. The part is typically applied over the bezel of the display (which is black) and the bracket (which is light gray "EG" steel). These contrasting materials must be hidden by the overlay.
- (2,3) Masking on the bottom of the part must be arranged so the adhesive can be exposed and the part applied to its bracket while keeping the protective masking in place over the clear window.
